

GEA

# CIRCOPURE AFM 240KG - 7724-1155-400

## Category:

Livestock > Dairy Detergent & Hygiene

## Product Description:

GEA CircoPure AFM 240kg is a **chlorine-free, alkaline liquid detergent** specifically formulated for cleaning milking equipment and milk cooling systems. Its powerful composition effectively removes milk residues, including fats and proteins, ensuring optimal hygiene standards in dairy operations. This detergent is suitable for use with all water hardness levels and can be utilized in both traditional and automated milking systems.

---

## Key Features:

- ✓ **Chlorine-Free Formula** – Reduces the risk of residue contamination and is environmentally friendly
  - ✓ **Effective Cleaning** – Efficiently dissolves and removes milk fats and proteins from equipment surfaces
  - ✓ **Versatile Application** – Suitable for milking machines, bulk tanks, and automated milking systems
  - ✓ **Compatible with All Water Hardness Levels** – Ensures consistent performance regardless of water quality
  - ✓ **Professional-Grade Quality** – Trusted by dairy professionals for maintaining high hygiene standards
- 

## Usage Instructions:

- **Dosage:** Use at a concentration of **0.5%** (i.e., 50 ml per 10 liters of water)
- **Water Temperature:** Start at **75°C** and ensure it does not drop below **54°C** during circulation.
- **Circulation Time:** **7 minutes** is recommended for optimal cleaning results.

**Note:** Always follow the manufacturer's guidelines and safety instructions when handling and using this product.

---

GEA CircoPure AFM 240kg is an essential component for dairy farmers aiming to maintain cleanliness and efficiency in their milking operations, thereby ensuring high-quality milk production.
