GEA Oxycide-Pre 20kg - 7724-5232-0000

Category:

Livestock > Dairy Detergent & Hygiene

## Product Description:

GEA Oxycide-Pre 20kg is a powerful **pre-milking disinfectant** designed specifically for the **agriculture and dairy industry**. This **peroxide-based** solution ensures **effective teat hygiene** before milking, reducing bacterial contamination and supporting udder health.

Formulated for **rapid action**, it helps lower the risk of **mastitis** by effectively eliminating pathogens from the teat surface, promoting clean and hygienic milking conditions.

---

## Key Features:

- ✓ **Peroxide-Based Pre-Milking Disinfectant** – Ensures optimal teat hygiene before milking
- ✓ **Effective Bacterial Control** – Helps reduce mastitis risk and improve milk quality
- ✓ **Fast-Acting & Easy to Use** – Rapid action for efficient pre-milking application
- ✓ **Supports Udder Health** – Maintains cleanliness and reduces bacterial load
- ✓ **Industry-Specific Formula** – Designed for use in agricultural and dairy environments

---

## Usage Instructions:

- **Apply directly** to teats before milking using a dip cup or spray system
- **Allow contact time** to ensure thorough disinfection
- **Wipe dry** before attaching milking equipment

---

## Why Use GEA Oxycide-Pre?

Maintaining **high udder hygiene standards** is essential for **milk quality** and **dairy farm productivity**. GEA Oxycide-Pre offers **proven pathogen control**, ensuring **safe and effective** pre-milking hygiene in **commercial dairy operations**.
